

SDS-TOP DRILL BITS

The new striking force from **DRILTEC** for the emerging **SDS-Top** mid range rotary hammers...

SDS-Plus hammers with the ideal drilling range of 5/32" to 1/2" in diameter and SDS-Max hammers with the ideal drilling range of 1" to 2" diameter leave a gap from 1/2" to 1". The new SDS-Top hammer generation fills this void.

SDS-TOP
